Advancing business blockchain adoption through global open source collaboration

Hyperledger is an open source community focused on developing a suite of stable frameworks, components, tools and libraries free to use in enterprise-grade blockchain deployments.

Hyperledger Blockchain Technologies for Business

- 275+ member companies
- 14 project codebases
- Highly modular technologies
- 170+ Meetup groups in 76 countries
- Open, transparent governance

The Hyperledger Greenhouse

For more detail on the blockchain frameworks and tools hosted in the Hyperledger greenhouse, visit hyperledger.org/projects

Distributed Ledgers

- **BESU**: Java-based Ethereum client
- **BURROW**: Permissionable smart contract machine (EVM)
- **FABRIC**: Enterprise-grade DLT with privacy support
- **INDY**: Decentralized identity
- **IROHA**: Mobile application focus
- **SAWTOOTH**: Permissioned & permissionless support, EVM transaction family

Tools

- **ARIES**: Java-based Ethereum client
- **QUILT**: Permissionable smart contract machine (EVM)
- **CALIPER**: Enterprise-grade DLT with privacy support
- **CELLO**: Decentralized identity
- **EXPLORER**: Mobile application focus
- **GRID**: Permissioned & permissionless support, EVM transaction family

Domain-Specific

- **URSA**: Hyperledger Labs

Hyperledger Community Resources

All are encouraged to contribute to the development of our open source projects:

- Discover training, white papers, case studies, blockchain showcase, research reports and more at [hyperledger.org/resources](http://hyperledger.org/resources)
- Learn more about the way we work at [wiki.hyperledger.org](http://wiki.hyperledger.org)
- Subscribe to Hyperledger mailing lists at [lists.hyperledger.org](http://lists.hyperledger.org)
- Join the discussion on Chat at [chat.hyperledger.org](http://chat.hyperledger.org)
- Join the Meetup nearest you at [hyperledger.org/meetups](http://hyperledger.org/meetups) or contact us to organize a Hyperledger Meetup in your city via [meetup@hyperledger.org](mailto:meetup@hyperledger.org)
- Join a Technical Working Group or Sector Special Interest Group at [hyperledger.org/join-a-group](http://hyperledger.org/join-a-group)
- Browse the Hyperledger Vendor Directory of member companies that offer products and services based on Hyperledger technologies at [hyperledger.org/resources/vendor-directory](http://hyperledger.org/resources/vendor-directory)
- Submit your project built with Hyperledger technology to the Blockchain Showcase at [hyperledger.org/resources/blockchain-showcase](http://hyperledger.org/resources/blockchain-showcase)
- Search for open bugs or report a new one at [jira.hyperledger.org](http://jira.hyperledger.org).
  Report security bugs to [security@hyperledger.org](mailto:security@hyperledger.org).

Learn more ways to make an impact on Hyperledger projects at [hyperledger.org/community](http://hyperledger.org/community)

---

Join the Hyperledger community as a corporate member and...

- Contribute to the strength and longevity of a core technology to your business.
- Publicly proclaim your leadership in the blockchain space.
- Work with other blockchain leaders to develop and promote Hyperledger.

For membership inquiries visit [hyperledger.org/members/join](http://hyperledger.org/members/join) or email info@hyperledger.org

“Hyperledger aims to serve as a trusted source of innovative, quality-driven open source, collaborative software development, creating modular, open source components and platforms. The optimal focus of Hyperledger is to advance industry goals of distributed ledger and smart contract technologies. Hyperledger is forging a brand that will be widely seen as the accepted default ‘safe’ deployment platform for enterprise teams, and be seen as a great home for active collaboration around new technologies. At that point, we can say ‘mission accomplished.’” – Hyperledger Executive Director Brian Behlendorf
