

Trusted Data Pool and Trusted Supply Chain Finance System

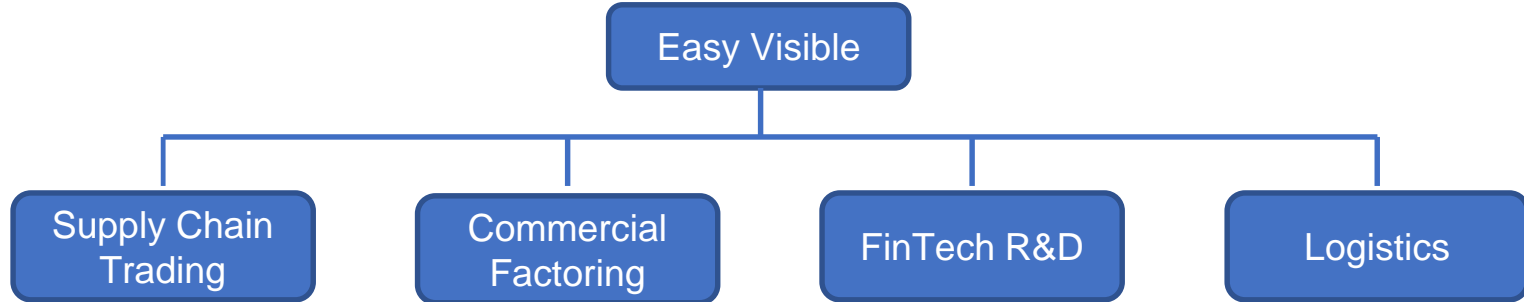

Tiancheng Liu, Chief Technology Officer, *Easy Visible Sky Tree Technology (Beijing) Co., Ltd.*

Easy Visible Supply Chain Management Co., Ltd

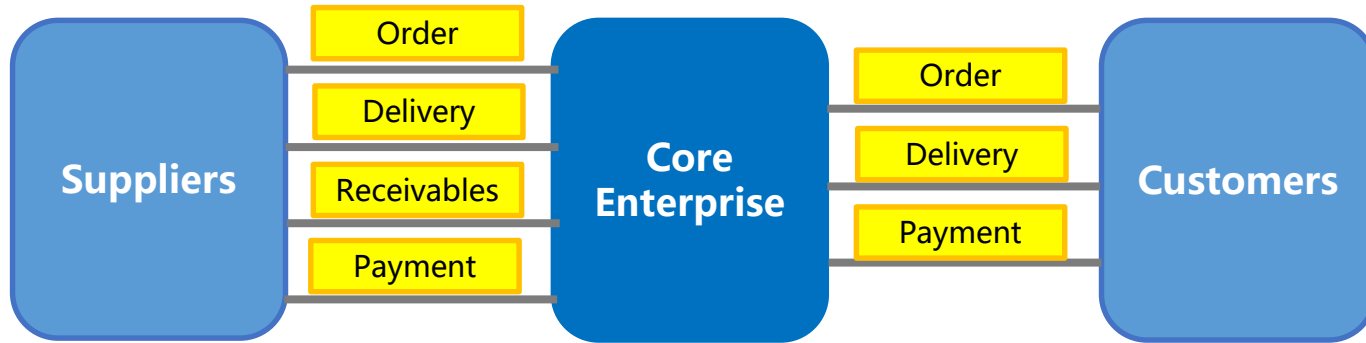

Focuses on Supply chain Management and Fin-Tech services.

Make transactions **VISIBLE** and **TRANSPARENT**

By utilizing Trusted Data Pool and Blockchain technologies, develop digitized asset based Supply Chain Finance platform

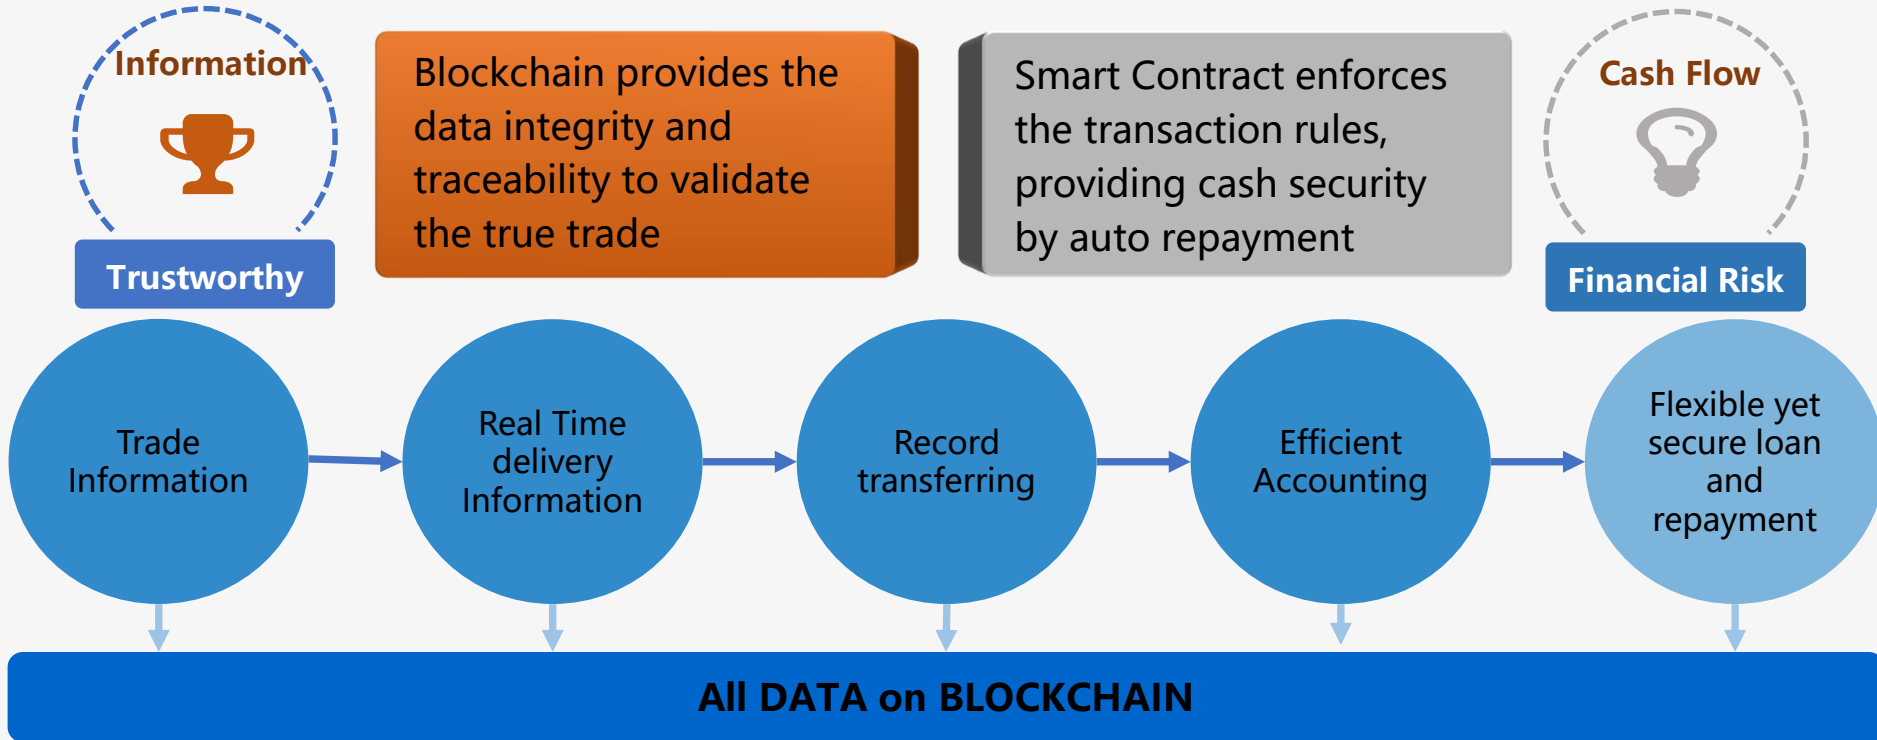

Supply Chain and Supply Chain Finance

Basic Risk Management Foundations:

- Core enterprise's credibility
- Ownership or Pledge of physical goods / commodities

Blockchain helps in Information and Cash Flow Close-loop

Difficulties in Supply Chain Finance Practice

Data Openness of enterprises

Data Validation across trading participants

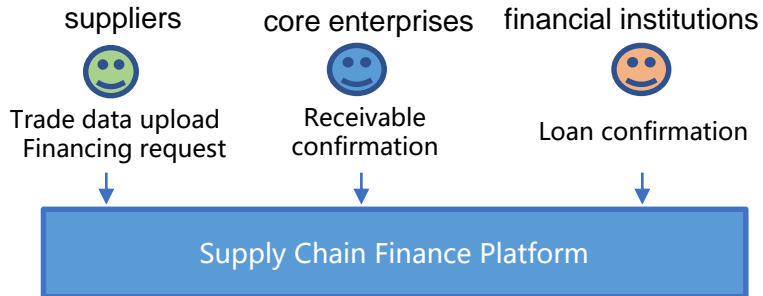

Remote Supervision of goods in warehouse

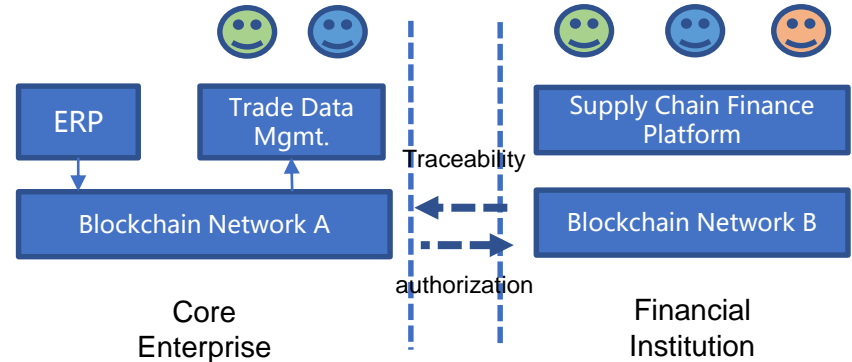

Data Openness

- Willingness: benefits of opening data
- Security: abuse of data
- Privacy: consequence of data leakage
- Cost: resources of implementation

Platform using User-uploaded Data

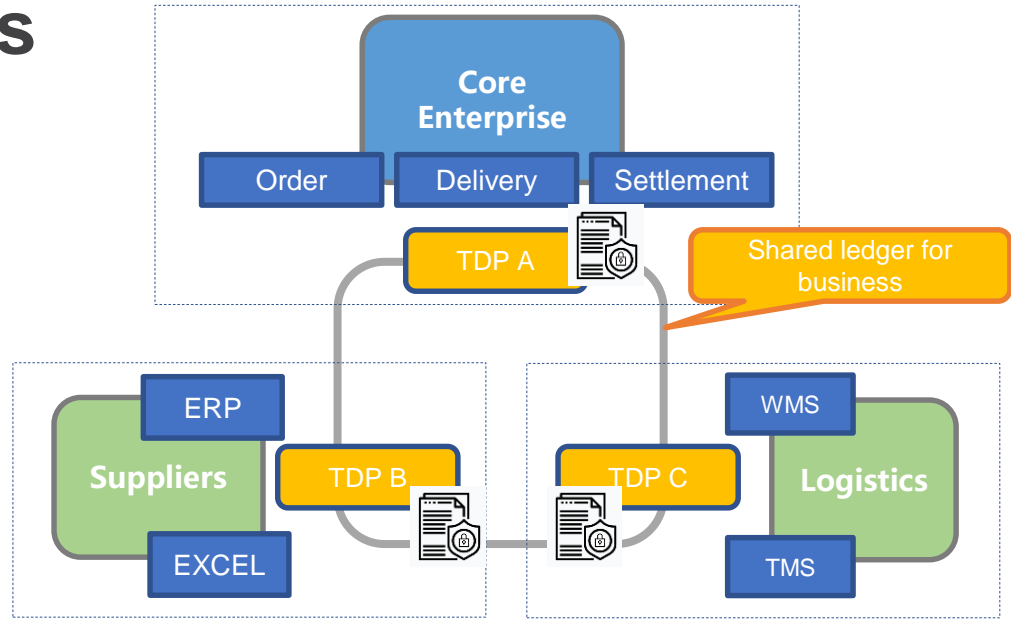

Blockchain-based Trusted Data Sharing

- Real-time data recording in enterprise blockchain
- Enterprise owns the data controls sharing
- Other entities need authorizations to view the data
- Data authorization and access recorded on-chain as well

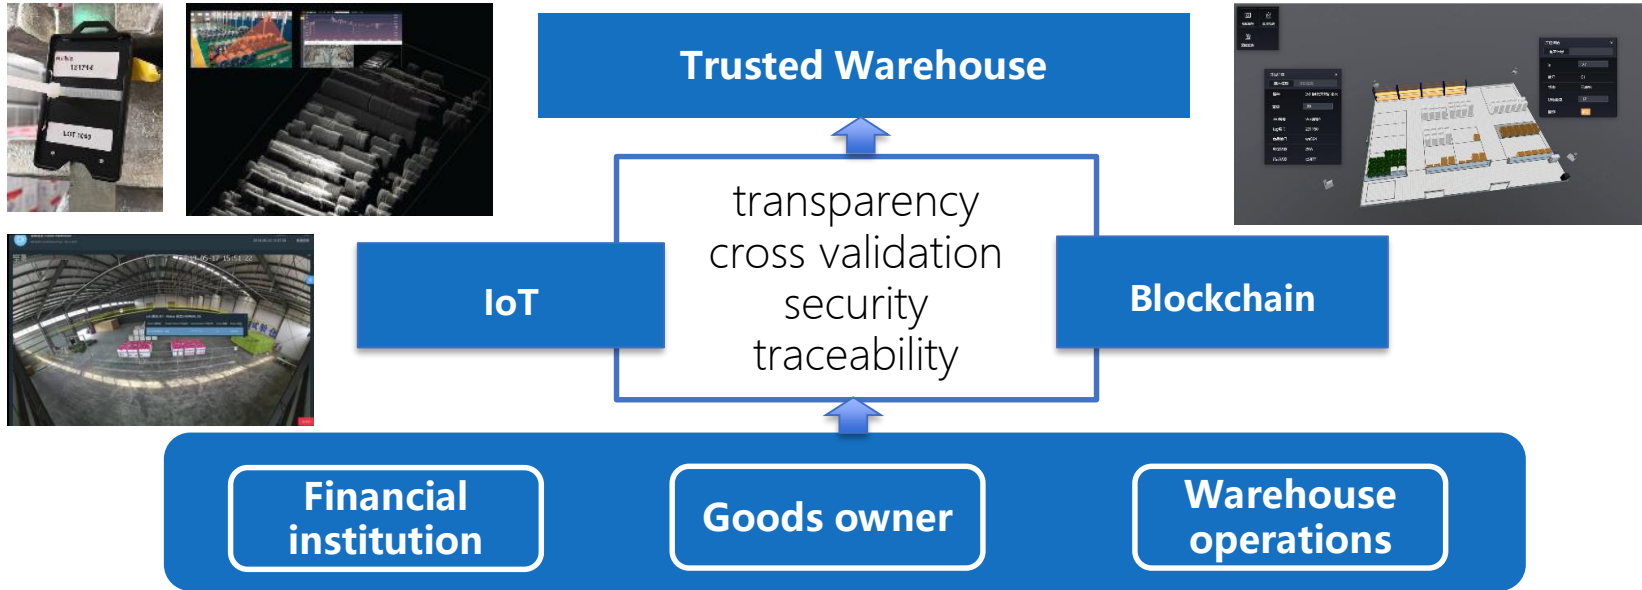

Data Validation across trading participants

- Shared ledger created by enterprise
- Real-time data sharing on-chain
- Data consistency guaranteed by consensus mechanism

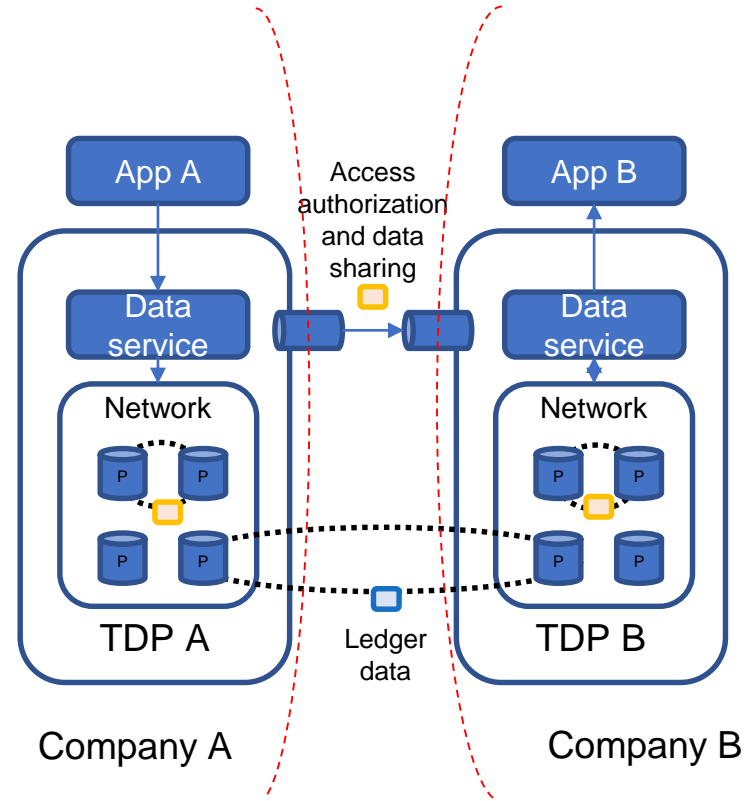

Goods Supervision

IoT and Blockchain empowered Trusted Warehouse

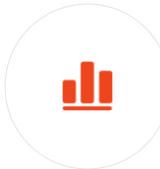

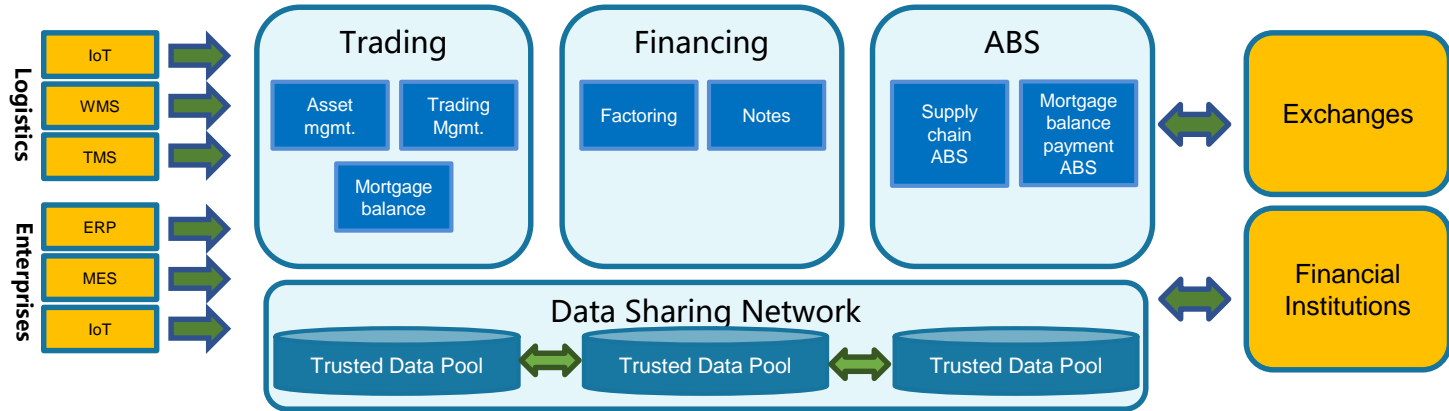

Trusted Data Pool

- Self-service chain creation
- Data sharing across TDPs by application or on-chain
- Data services with simple APIs and abstraction

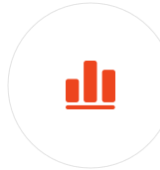

Supply Chain Finance Platform

Trusted Assets & Transparent Transactions

TDPs: 14
Ledgers: 24
Nodes: 74

Trusted Transactions: 15B RMB
Loan Amount: 4.7B RMB
